OmegaPS LSAR - Data Query Tool

secure. manage. deliver.

PreRequisite: OmegaPS LSAR - Basic or OmegaPS LSAR - Refresher

Classroom Duration: 2 days Virtual Duration: 5 x 3 hours

Oracle has updated and changed their data query functionality, and ILS/IPS practitioners need to become skilled in using this new functionality as a critical enabler to data examination, validation and verification and export.

This course will provide ILS/IPS practitioners and supportability engineers with updated skills to use the most recent data query tools provided with the OmegaPS LSAR software.

Chapter 1	**Data Models**
	• Overview • Where to start • Understanding the OmegaPS Data Model • Understanding joins and keys • Admin Functions
Chapter 2	**Fundamentals of the OmegaPS Data Query Tool**
	• Starting the OmegaPS Data Query Tool • Understanding SQL • Authoring reports • Reading Reports • Downloading techniques
Chapter 3	**Leveraging the OmegaPS Data Query Tool using Advanced Techniques**
	• Moving reports to other instances. • Manipulating SQL • Complex Queries
