

OmegaPS LSAR - Data Query Tool

secure. manage. deliver.

PreRequisite: OmegaPS LSAR - Basic or OmegaPS LSAR - Refresher

Classroom Duration: 2 days **Virtual Duration:** 5 x 3 hours

Oracle has updated and changed their data query functionality, and ILS/IPS practitioners need to become skilled in using this new functionality as a critical enabler to data examination, validation and verification and export.

This course will provide ILS/IPS practitioners and supportability engineers with updated skills to use the most recent data query tools provided with the OmegaPS LSAR software.

Chapter 1	Data Models
	<ul style="list-style-type: none">• Overview• Where to start• Understanding the OmegaPS Data Model• Understanding joins and keys• Admin Functions
Chapter 2	Fundamentals of the OmegaPS Data Query Tool
	<ul style="list-style-type: none">• Starting the OmegaPS Data Query Tool• Understanding SQL• Authoring reports• Reading Reports• Downloading techniques
Chapter 3	Leveraging the OmegaPS Data Query Tool using Advanced Techniques
	<ul style="list-style-type: none">• Moving reports to other instances.• Manipulating SQL• Complex Queries
