

TECHNICAL PUBLICATIONS AS A SERVICE

Developing and maintaining S1000D-compliant publications requires specialised tools, deep domain expertise, and strict adherence to evolving standards. Outsourcing and workforce augmentation strategies offer organisations a powerful way to **reduce costs, improve quality, and enhance agility. That's where Pennant can help you.**

Pennant's Technical Publications as a Service is delivered in the following forms:

FULL TECH PUBS
OUTSOURCING

EMBEDDING EXPERT
CONTRACTORS

LEGACY DATA
CONVERSION

Full Technical Publications Outsourcing

This involves outsourcing the entire publication development work package to a specialized S1000D and / or ATA publications expert. This comes with a wide range of benefits:

- Enhanced quality by using a proven and experienced team to deliver your Technical Publications solution
- Reducing your IT overhead and facilities footprint
- Reducing your upfront costs by eliminating the need to stand up an internal Technical Publications capability
- Reducing your training burden and recruitment costs
- Reducing your risk through the use of experienced S1000D and ATA SMEs

Workforce Augmentation: Embedding Expert Contractors

This hybrid model of workforce augmentation allows companies to retain control over documentation strategy while enhancing their capabilities with specialised expertise.

- Gain the flexibility to scale up quickly
- Maintain internal oversight and alignment with broader business goals
- Accelerate project timelines by complimenting your Technical Publications capability with industry SMEs
- Mentor internal staff and introduce best practices
- Reduced long time hiring costs without the long-term commitment of a full-time hire

Legacy Data Conversion

Outsourcing the conversion of legacy technical publications to S1000D is a strategic move that accelerates modernisation while minimising internal disruption.

- Accelerate delivery
- Reduce overhead of internal conversion efforts
- Ensure consistency and accuracy
- Avoid steep learning curve

Additional Technical Manual & Documentation Services

- IETP & IETM Technical Manual creation
- Proofreading & Copy Editing
